
Converting RGB to HSV and Returning Reduced Image

Authors: Shane Sarnac and Antoine Steiblen

```
function [saved,z1] = Compress_RGB_to_HSV(img)

% Convert to hsv from rgb
rgb = imread(img);
hsv = rgb2hsv(rgb);

% Determine the size of the matrix
[rows, columns, depth] = size(hsv);
Vert_mat = rows/8;
check_rows = Vert_mat - floor(Vert_mat);
extra_row = 0;

if check_rows > 0;
    extra_row = 1;
end

step_row = floor(Vert_mat) + extra_row;

Hor_mat = columns/8;
check_columns = Hor_mat - floor(Hor_mat);

extra_col = 0;

if check_columns > 0;
    extra_col = 1;
end

step_col = floor(Hor_mat) + extra_col;

hsv = hsv(1:(end-extra_row),1:(end-extra_col),:);

c = 1;
saved = 0;

% Break up into 8x8 blocks, reduce each one, and count the bytes saved
% (saved)
for j = 1:8:floor(Hor_mat)*8
    for i = 1:8:floor(Vert_mat)*8
        a = 7;
        b = 7;
        [reduced(c).data,z1,z2,z3] = Reducer(hsv(i:(i+a),j:(j+b),:));
        x = [z1;z2;z3];
        [rowIdx,colIdx] = find(x);
        v = accumarray(rowIdx,colIdx,[],@max)';
        [v1, v2, v3] = size(v);
        if v2 < 3;
```

```

        v(3) = 0;
    end
    saved = saved + sum([64 64 64] - v);
    c = c + 1;
end

end

display(saved);

% Rebuild matrix from reduced form
Mat = [];
counter = 1;
for c = 1:(floor(Hor_mat))

    Col = [];

    for r = 1:floor(Vert_mat)
        Col = [Col;reduced(1,(counter)).data];
        counter = counter + 1;
    end

    Mat = [Mat,Col];

end

% Convert back to rgb and show image
Mat = hsv2rgb(Mat);
figure;
imshow(Mat)

end

Error using Compress_RGB_to_HSV (line 7)
Not enough input arguments.
